Protection in step with your lifestyle.

SuperShield gives you the confidence to not worry about spills or stains caused by water, oil, or soil. Whether it is the soil tracked in from the front door, a soda spill, or a tipped dinner plate — you can quickly vacuum up the soil or clean up the spill.

Easy, quick-drying SuperShield

is applied as a spray onto your freshly cleaned carpet by a professional carpet cleaner. It leaves no odor or residue. It is non-toxic and safe to

use around your family and pets. SuperShield is also CFC-free.

The carpet industry recommends the application of a carpet protector after each cleaning on all

carpet types, including those with built-in soil and stain protection.

MasterBlend®

Formulated to meet or exceed all established standards of wool fiber producers and fifth generation stain resistant carpet manufacturers.

Making life easier.

SuperShield gives you extra time to clean up and remove spills and dirt before they are absorbed into the carpet, with less wicking and less spreading of stains.

- Solid and semi solid spills should be scraped lightly with a table knife to remove the excess.
- Liquid spills should be blotted up immediately with a towel or absorbent cloth.
- If spills dry or are forced into the carpet, normal cleaning procedures should remove them easily.
- Be sure to rinse thoroughly with water to remove residual cleaning materials.
- Use **ResponsibleCare™ Spotter** as necessary.

Treat your carpet, treat yourself.

Treating your carpet with professionally applied carpet protector after a cleaning means treating yourself to less work, fewer worries and the satisfaction of brighter, cleaner, newer-looking carpets. With SuperShield, you'll discover more carefree living every day.

Carpet treated with StainShield

Untreated carpet

Note: SuperShield carpet protector provides excellent repellency on carpets of all fiber types, including wool. Results as pictured above may vary depending on the condition and style of carpet treated.
